PREFACE

HYPERLINK FEATURE

The digital version of this report has been hyperlinked. Click on the title of a section or a table in the List of Tables and you will be automatically directed to the actual content section or table in the report.

This report provides the detailed results for each question from this school/district's 2017-18 *California Healthy Kids Survey* (CHKS), presented in tables organized by topic.

The CHKS, along with its two companion surveys—*California School Staff Survey* (CSSS) for staff and the *California School Parent Survey* (CSPS)—is a service of the California Department of Education (CDE). These three surveys form the *California School Climate, Health, and Learning Surveys* (CalSCHLS) System, the largest, most comprehensive state effort in the nation to regularly assess students, staff, and parents at the local level to provide key data on school climate and safety, learning supports and barriers, and stakeholder engagement, as well as youth development, health, and well-being. Exhibit 1, at the end of the Preface, presents the major school-related domains and constructs assessed by CalSCHLS.

These surveys grew out of CDE's commitment to helping schools promote the successful cognitive, social, emotional, and physical development of all students; create more positive, engaging school environments for students, staff, and parents; and ensure college and career readiness. They provide a wealth of information to guide school improvement and **Local Control and Accountability Plan** (LCAP) efforts, particularly in regard to the state priorities of enhancing school climate, pupil engagement, parent involvement, and addressing the needs of vulnerable groups.

Factsheets, guidebooks, and other resources to help in understanding and using CHKS results are available for downloading from the survey website (chks.wested.org), including *Helpful Resources for Local Control and Accountability Plans* (chks.wested.org/resources/LCAP-Cal_SCHLS.pdf). The California Safe and Supportive Schools website (CaliforniaS3.wested.org) provides information and tools helpful in implementing effective strategies to address the needs identified by the survey.

The CalSCHLS Technical Assistance Center offers a Data Workshop to help identify local needs and develop action plans to meet those needs, including a *Listening to Students Workshop* for involving student voice in the process (see below).

THE SURVEY

The California Department of Education (CDE) has funded the CHKS since 1997 to provide data to assist schools in: (1) fostering safe and supportive school climates, social-emotional competencies, and engagement in learning; (2) preventing youth health-risk behaviors and other barriers to academic achievement; and (3) promoting positive youth development, resilience, and well-being. A thorough understanding of the scope and nature of these student behaviors, attitudes, experiences, and supports is essential for guiding school improvement and academic, prevention, and health programs.

The CHKS is not just a standalone instrument but a data collection system that districts can customize to meet local needs and interests. The secondary-school CHKS consists of a required general Core Module

and a series of optional, supplementary topic-focused modules that districts can elect to administer. Districts may also add their own questions of local interest in a custom module. Table 1 indicates the modules administered by the district/school.

Core Module

As outlined in Exhibit 1, the Core Module consists of key questions, identified by an expert advisory committee, that are considered most important for schools to guide improvement of academic, health, and prevention programs and promote student achievement, college and career readiness, positive development, and well-being. The great majority of the questions are school-specific, including the following indicators:

- Student grades, truancy, attendance rate and reasons for missing school, academic motivation, and school connectedness, as indicators of engagement;
- The levels of students' three fundamental developmental supports (protective factors) that promote positive academic, social, and emotional outcomes: experiences of caring adult relationships, high expectations, and opportunities for meaningful participation at school;
- Perceived safety and the frequency and type of harassment and bullying at school; and
- Levels of violence, substance use, and crime-related behavior (e.g., weapons possession) at school.

The Core Module also includes a wide range of demographic questions to help districts identify and address the needs of significant and vulnerable student subgroups, including those required to be included in the LCAP efforts. These include race/ethnicity, gender, and socioeconomic status; homeless, migrant, and foster status; and English language proficiency.

What's New? For 2017-18, the following improvements are made to the Core Module:

- Added questions assessing frequency of school absences; lifetime frequency of heroin use, and vaping, eating, or drinking marijuana; perceived harm and availability of e-cigarettes; being an immigrant as a reason for being harassed or bullied;
- Modified sexual orientation question to better assess gender identity; and
- Expanded Opportunities for Meaningful Participation scale questions for better reliability.

Supplemental School Climate Module

To further support school improvement efforts and the LCAP process, a supplementary School Climate Module is available. It provides additional data on student academic mindset, school academic supports, discipline/order, supports for social-emotional learning, bullying prevention and positive peer relationships, respect for diversity, and the quality of the physical environment (download from chks.wested.org/administer/download/supplemental/#clim). These questions are also included in the staff survey, so you can compare staff and student perceptions on the same constructs.

Supplemental Social Emotional Health Module (SEHM)

The SEHM greatly enhances the value of the CHKS as a strength-based assessment of positive emotions, engagement, ability to build and maintain relationships, and other social-emotional competencies linked to student mental health and well-being, academic success, and college and career readiness. It includes 56 items that capture the totality of core adolescent psychological assets.

SURVEY ADMINISTRATION AND SAMPLING

School staff administered the survey, following detailed instructions provided by CDE that were designed to assure the protection of all student and parental rights to privacy and to maintain confidentiality. Students were surveyed only with the consent of parents or guardians. Student participation was voluntary, anonymous, and confidential.

- Table A1.1 gives the target sample of students and the final number and percent of students who completed the survey (the participation response rate).
- Appendix I lists all the secondary schools in the district that were eligible to participate in the survey and the percentage of students enrolled in each of them that completed the survey (included in the district report).
- Appendix II provides detailed information about the survey content areas (included in the district report).

THE REPORT

The survey results are reported in tables, organized by topic, that provide the percentages responding to each question response option by grade level. Because it is just as important to identify the positive behaviors of youth as it is to identify the risks they face, the tables reporting risk-behavior data include the percentages of youth who responded negatively (did not engage in the behavior).

Racial/Ethnic and Gender Results

Summary tables provide key findings (e.g., safety, harassment, developmental supports, school connectedness) disaggregated by race/ethnic categories and gender (see Sections 9 and 10). Schools can request supplementary reports disaggregating all their CHKS results by the race/ethnicity or gender of students or by other demographic categories (see Next Steps below).

UNDERSTANDING THE DATA

Care must be taken to understand the factors that can impact the quality, validity, and generalizability of the results, such as changes that occur in survey content, administration, and/or sample characteristics between administrations. The following are a few of the key issues that should be kept in mind. A more detailed discussion of these topics can be found in the *CHKS Guidebook to Data Use and Dissemination* (download chks.wested.org/resources/chks_guidebook_3_datause.pdf).

Sample Characteristics.

Among the most important factors affecting the quality of survey results is the level and type of student participation. The validity and representativeness of the results will be adversely affected if the student response rate is lower than 70%. One indication of the survey's representativeness is how accurately the sample reflects the gender and ethnic composition of the student enrollment. Even if the response rate is low, the results provide an indication of what those students who did respond felt about the school and their experiences and behavior.

Changes Between Survey Administrations.

Many factors besides real changes in behavior, attitudes, or experiences among students may account for changes in results from administration to administration. Changes may be due to differences over time in

the characteristics or size of the sample of students who completed the survey, changes in the questions themselves, or differences between time periods in which the survey was administered (e.g., some risk behaviors tend to increase as students age, or may increase during holidays or social events).

RESOURCES

The CHKS website contains numerous guidebooks and other resources for using and understanding survey results.

- *CHKS Guidebook to Data Use and Dissemination* provides step-by-step instructions on how to interpret survey results and effectively disseminate them (download chks.wested.org/resources/chks_guidebook_3_datause.pdf).
- CHKS factsheets (chks.wested.org/using-results/factsheets) analyze key topics at the state level, show how data variables are related, and offer suggestions for how data can be analyzed at the local level.
- *Making Sense of School Climate* provides a discussion of all the CalSCHLS survey items that relate to school climate (download californiaS3.wested.org/resources/S3_schoolclimateguidebook_final.pdf).
- *Helpful Resources for Local Control and Accountability Plans* (chks.wested.org/resources/LCAP_Cal_SCHLS.pdf) describes how survey items align with LCAP priorities and indicators. Also available is an LCAP-related PowerPoint presentation (chks.wested.org/training-support/workshops-presentations).
- The *School Climate Connection Newsletter* provides monthly announcements of resources, tools, webinars and workshops, and research. Sign up on the CHKS or CaliforniaS3 websites.
- CDE's **California Safe and Supportive Schools** website (CaliforniaS3.wested.org) contains a wealth of information and tools related to school climate improvement and social-emotional learning. It includes factsheets analyzing CalSCHLS data and *What Works Briefs* that provide guidance on strategies to implement.

NEXT STEPS

Receiving this report is just a beginning step in a data-driven decision-making process of continuous improvement. The following describes some followup steps you should take and some custom services (additional fees apply) available from the CalSCHLS TA Center to help in fostering effective use of the results and provide additional information to support school and program improvement efforts and the LCAP process.

Engage Students, Staff, and Parents in Reviewing the Results and Action Planning

First and foremost, engage students, staff, parents, and community stakeholders in reviewing and exploring the meaning of the results and obtain their input into how the school might better meet the identified needs and into the development of a detailed action plan. This communicates to stakeholders that you value their input into how to improve the schools and gives them an opportunity for meaningful participation. This helps enhance pupil engagement and parent involvement, two LCAP priorities. Their input, in turn, will help in identifying school needs and developing an effective response. It will also promote higher

rates of participation the next time the survey is administered, as stakeholders will see how the data has been used for positive purposes.

As part of this process, it is highly recommended that you conduct a structured *Listening to Students Workshop* in which you explore with students, as adults observe, the meaning of survey results and obtain their input on how to address the needs identified by the survey and school improvement in general. These workshops were found to be a highly effective in fostering school climate improvements as part of CDE's Safe and Supportive School Projects (see CaliforniaS3.wested.org). For more information, email schoolclimate@wested.org.

Compare Results with Other Data

The value of your CHKS results will be greatly enhanced if examined in the content of the following sources of related data.

- **Staff and Parent Surveys.** The results of this student survey should be compared to those obtained from the CalSCHLS surveys of school staff and parents. It is important to determine how consistent are student, staff, and parent perceptions and experiences. If you did not administer these companion surveys, consider doing so next time.
- **Elementary CHKS Results.** Examine how the results from 7th, 9th, and 11th graders compare with those from 5th graders on common indicators to see the developmental trajectory in the results and explore what programs at the elementary level might help mitigate problems that are evident among older students.
- **Other Data.** Examine how the results compare with other data typically collected by schools that relate to the variables assessed, such as discipline referrals, school demographic information, school vandalism costs, and behavioral observations in classrooms.

Data Workshop

To assist in your review of the survey results, you can request the CalSCHLS TA Center to conduct a structured, customized Data Workshop. In this workshop, a survey specialist works with district stakeholders to promote better understanding of the results and to identify local needs that need to be addressed. The workshops can also include engaging stakeholders in developing a detailed Action Plan and timetable for meeting those needs using evidence-based strategies.

For more information, contact your CalSCHLS TA Center (call 888.841.7536) or email schoolclimate@wested.org.

Request Additional Reports and Data

As you review your data with stakeholders, you may find that additional data needs emerge. The following custom services (additional fees apply) are available through the CalSCHLS TA Center to help delve more deeply into your survey results and foster more effective use of the results in support of school and program improvement efforts and the LCAP process.

School Reports and School Climate Report Cards

If the schools in the district vary significantly in demographics, programs, or other characteristics, consider requesting individual reports for each school (a fee applies). Two types of reports are available:

- A full report with all the survey results; and

- A short, user-friendly, graphic **School Climate Report Card** that provides results across eight domains of school climate and provides an overall **School Climate Index** score based on those domains. (View a sample report: visit californiaS3.wested.org/resources/California_State_SCRC_1314.pdf).

District School Climate Report Card

For districts that survey all their schools, a district-level School Climate Report Card can be requested. This is a powerful, useful tool for guiding efforts to meet the school climate and pupil engagement priorities for the Local Control and Accountability Plan.

Disaggregated Reports

The staff of the Regional TA Centers can produce full reports that look at how results vary by demographic subgroups (e.g., race/ethnicity as discussed above, or by youth who are low in academic motivation compared those who are high). This is particularly important given the LCAP requirement that districts identify and address the needs of underserved, vulnerable subgroups. This helps in understanding the meaning of the results and developing interventions that target groups most in need.

Analyze Dataset

The complete dataset is available electronically for additional analysis (there is a small fee for preparation). The dataset enables analyses of patterns in the results, how they are interrelated, and how they vary by different subgroups of students and across schools within a district. You can also request an analysis from the CalSCHLS TA Center as a custom service.

Add Questions to Your Next Surveys

Determine what additional information is needed from students to guide school improvement efforts and add questions to your next CHKS, staff, or parent surveys. All three surveys are designed so that schools can add additional questions to help them conduct a more individualized and comprehensive assessment.

Exhibit 1**Major School-related Domains and Constructs Assessed by CalSCHLS in Secondary Schools**

	Student Core	Student School Climate	Student Social Emotional Health	Staff Survey	Parent Survey

Asian	2	3	4	2
Black or African American	1	1	1	0
Native Hawaiian or Pacific Islander	0	1	0	2
White	51	62	62	55
Mixed (two or more) races	38	32	30	37

Question HS/MS A.6: What is your race?

Note: Cells are empty if there are less than 10 respondents.

Table A3.4
Living Situation

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
A home with one or more parent or guardian	90	94	94	86
Other relative's home	2	2	1	0
A home with more than one family	1	1	2	6
Friend's home	0	0	1	0
Foster home, group care, or waiting placement	0	0	0	0
Hotel or motel	0	0	0	2
Shelter, car, campground, or other transitional or temporary housing	1	0	0	4
Other living arrangement	7	2	1	2

Question HS/MS A.8: What best describes where you live? A home includes a house, apartment, trailer, or mobile home.

Note: Cells are empty if there are less than 10 respondents.

Table A3.5
Highest Education of Parents

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Did not finish high school	3	8	10	14
Graduated from high school	15	14	15	31
Attended college but did not complete four-year degree	16	14	19	20
Graduated from college	43	49	47	16
Don't know	24	15	9	18

Question HS/MS A.9: What is the highest level of education your parents or guardians completed? (Mark the educational level of the parent or guardian who went the furthest in school.)

Note: Cells are empty if there are less than 10 respondents.

Table A3.6***Free or Reduced Price Meals Eligibility***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
No	51	66	64	36
Yes	32	21	24	48
Don't know	17	13	12	16

Question HS/MS A.10: Do you receive free or reduced-price lunches at school? (Receiving free or reduced-price lunches means that lunch at school is provided to you for free or you pay less for it.)

Note: Cells are empty if there are less than 10 respondents.

Table A3.7***Participation in Migrant Education Program, Past 3 Years***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
No	78	88	95	88
Yes	2	1	1	0
Don't know	21	11	4	12

Question HS/MS A.11: In the past three years, were you part of the Migrant Education Program or did your family move to find seasonal or temporary work in agriculture or fishing?

Note: Cells are empty if there are less than 10 respondents.

Table A3.8***Language Spoken at Home***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
English	86	89	88	86
Spanish	11	9	11	10
Mandarin	0	0	0	4
Cantonese	0	0	0	0
Taiwanese	0	0	0	0
Tagalog	0	1	0	0
Vietnamese	0	0	0	0
Korean	0	0	0	0
Other	2	0	1	0

Question HS/MS A.12: What language is spoken most of the time in your home?

Note: Cells are empty if there are less than 10 respondents.

Table A3.9**English Language Proficiency – All Students**

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
How well do you...				
understand English?				
Very well	92	96	95	86
Well	8	4	5	14
Not well	0	0	0	0
Not at all	0	0	0	0
speak English?				
Very well	87	93	92	88
Well	13	5	7	12
Not well	0	1	1	0
Not at all	0	1	0	0
read English?				
Very well	87	93	89	80
Well	13	6	10	16
Not well	0	1	1	4
Not at all	0	0	0	0
write English?				
Very well	80	90	87	71
Well	19	9	11	27
Not well	1	1	1	2
Not at all	0	1	0	0
English Language Proficiency Status				
Proficient	85	91	90	76
Not proficient	15	9	10	24

Question HS/MS A.13-16: How well do you understand, speak, read, and write English?... Understand English... Speak English... Read English... Write English.

Notes: Cells are empty if there are less than 10 respondents.

English Language Proficiency was determined by creating a scale score using four survey questions - how well do you understand... speak... read... and write English. Response options are reverse coded so higher values indicate higher English proficiency level (“Not at all” (1); “Not well” (2); “Well” (3); and “Very well” (4)). The scale score was computed by averaging the survey responses. Respondents are categorized as “Proficient” or “Not Proficient” based on the English language proficiency scale.

Proficient: students with average item response > 3.5; and

Not Proficient: students with average item response ≤ 3.5.

Table A3.10**English Language Proficiency – Students Speaking a Language Other Than English at Home**

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
How well do you...				
understand English?				
Very well	80	78	86	
Well	17	19	14	
Not well	2	3	0	
Not at all	0	0	0	
speak English?				
Very well	67	75	87	
Well	33	19	13	
Not well	0	3	0	
Not at all	0	3	0	
read English?				
Very well	75	78	69	
Well	25	19	24	
Not well	0	3	7	
Not at all	0	0	0	
write English?				
Very well	66	69	66	
Well	30	25	31	
Not well	5	0	3	
Not at all	0	6	0	
English Language Proficiency Status				
Proficient	66	72	72	
Not proficient	34	28	28	

Question HS/MS A.13-16: What language is spoken most of the time in your home?... How well do you understand, speak, read, and write English?... Understand English... Speak English... Read English... Write English.

Notes: Cells are empty if there are less than 10 respondents.

English Language Proficiency was determined by creating a scale score using four survey questions - how well do you understand... speak... read... and write English. Response options are reverse coded so higher values indicate higher English proficiency level (“Not at all” (1); “Not well” (2); “Well” (3); and “Very well” (4)). The scale score was computed by averaging the survey responses. Respondents are categorized as “Proficient” or “Not Proficient” based on the English language proficiency scale.

Proficient: students with average item response > 3.5; and

Not Proficient: students with average item response ≤ 3.5.

Table A3.11***Number of Days Attending Afterschool Program***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
0 days	88	68	65	86
1 day	2	0	2	6
2 days	3	2	1	2
3 days	2	1	4	2
4 days	2	2	3	0
5 days	4	26	25	4

Question HS/MS A.17: How many days a week do you usually go to your school's afterschool program?

Note: Cells are empty if there are less than 10 respondents.

Table A3.12***Military Connections***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
No	93	95	95	100
Yes	4	4	4	0
Don't know	3	1	1	0

Question HS A.128/MS A.117: Is your father, mother, or guardian currently in the military (Army, Navy, Marines, Air Force, National Guard, or Reserves)?

Note: Cells are empty if there are less than 10 respondents.

Table A3.13
Sexual Orientation

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Straight (not gay)	82	82	82	87
Gay or Lesbian	1	2	2	2
Bisexual	5	7	7	4
I am not sure yet	7	5	4	2
Something else	1	2	2	0
Decline to respond	4	2	4	4

Question HS A.129/MS A.118: Which of the following best describes you?

Note: Cells are empty if there are less than 10 respondents.

Table A3.14
Gender Identity

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
No, I am not transgender	93	95	98	98
Yes, I am transgender	1	2	0	2
I am not sure if I am transgender	2	2	0	0
Decline to respond	4	1	2	0

Question HS A.130/MS A.119: Some people describe themselves as transgender when their sex at birth does not match the way they think or feel about their gender. Are you transgender?

Note: Cells are empty if there are less than 10 respondents.

4. School Performance, Supports, and Engagement

Table A4.1
Grades, Past 12 Months

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Mostly A's	32	27	14	10
A's and B's	37	35	34	24
Mostly B's	6	6	9	12
B's and C's	17	16	23	29
Mostly C's	2	6	7	6
C's and D's	4	8	9	12
Mostly D's	1	1	2	6
Mostly F's	1	1	2	2

Question HS/MS A.18: During the past 12 months, how would you describe the grades you mostly received in school?

Notes: Cells are empty if there are less than 10 respondents.

Table A4.2
Truancy, Past 12 Months

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
0 times	82	82	67	44
1-2 times	9	8	10	4
A few times	6	6	13	28
Once a month	0	0	0	0
Twice a month	1	1	3	8
Once a week	1	1	2	4
More than once a week	1	2	5	12

Question HS/MS A.21: During the past 12 months, about how many times did you skip school or cut classes?

Notes: Cells are empty if there are less than 10 respondents.

Table A4.3***Absences, Past 30 Days***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
I did not miss any days of school in the past 30 days	44	46	33	24
1 day	23	26	29	24
2 days	19	14	18	18
3 or more days	15	14	21	35

Question HS/MS A.19: In the past 30 days, how often did you miss an entire day of school for any reason?

Notes: Cells are empty if there are less than 10 respondents.

Table A4.4***Reasons for Absence, Past 30 Days***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Does not apply; I didn't miss any school	41	46	30	24
Illness (feeling physically sick), including problems with breathing or your teeth	40	39	51	56
Were being bullied or mistreated at school	2	2	2	4
Felt very sad, hopeless, anxious, stressed, or angry	5	9	17	28
Didn't get enough sleep	5	9	18	28
Didn't feel safe at school or going to and from school	2	2	4	2
Had to take care of or help a family member or friend	2	3	7	2
Wanted to spend time with friends	0	1	4	4
Use alcohol or drugs	0	1	2	2
Were behind in schoolwork or weren't prepared for a test or class assignment	1	5	12	6
Were bored or uninterested in school	2	3	8	4
Had no transportation to school	1	2	3	10
Other reason	19	15	20	10

Question HS/MS A.20: In the past 30 days, did you miss a day of school for any of the following reasons? (Mark All That Apply.)

Notes: Cells are empty if there are less than 10 respondents. Total percentages may exceed 100% for "mark all that apply" items.

Table A4.5
School Environment Scales (Developmental Supports)

Any other drug, pill, or medicine to get “high” or for other than medical reasons				
0 times	97	96	96	86
1 time	1	2	2	2
2 to 3 times	1	1	2	0
4 or more times	0	1	1	12

Question HS A.56-60/MS A.54: During your life, how many times have you used the following?... Prescription pain medication or opioids (Vicodin™, OxyContin™, Percodan™, Lortab™), tranquilizers, or sedatives (Xanax™, Ativan™)... Diet Pills (Didrex, Dexedrine, Zinadrine, Skittles, M&M’s)... Ritalin™ or Adderall™ or other prescription stimulant... Cold/Cough Medicines or other over-the-counter medicines to get “high”... Any other drug, pill, or medicine to get “high” or for other than medical reasons.

Notes: Cells are empty if there are less than 10 respondents.

na—Not asked of middle school students.

Table A6.4***Lifetime Marijuana Consumption***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
<i>During your life, how many times have you used marijuana in any of the following ways...</i>				
Smoke it?				
0 times	97	87	60	24
1 time	0	4	5	4
2 to 3 times	1	3	9	6
4 or more times	1	6	26	65
In an electronic or e-cigarette or other vaping device?				
0 times	98	89	73	33
1 time	1	2	4	2
2 to 3 times	0	5	4	2
4 or more times	1	4	18	63
Eat or drink it in products made with marijuana?				
0 times	97	92	72	33
1 time	2	3	6	8
2 to 3 times	0	3	8	6
4 or more times	1	2	14	53

Question HS A.64-66/MS A.58-60: During your life, how many times have you used marijuana in any of the following ways... Smoke it?... In an electronic or e-cigarette or other vaping device?... Eat or drink it in products made with marijuana?

Note: Cells are empty if there are less than 10 respondents.

Table A6.5***Current AOD Use, Past 30 Days***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Alcohol (one or more drinks of alcohol)	4	7	19	41
Binge drinking (5 or more drinks in a row)	1	3	12	27
Marijuana (smoke, vape, eat, or drink)	2	7	25	60
Inhalants	1	1	1	6
Prescription drugs to get “high” or for reasons other than prescribed	na	1	1	8
Other drug, pill, or medicine to get “high” or for reasons other than medical	2	1	1	8
<i>Any drug use</i>	3	7	25	60
<i>Heavy drug use</i>	1	3	17	48
<i>Any AOD Use</i>	6	11	31	68
Two or more substances at the same time	na	2	6	14

Question HS A.70-76/MS A.64-68: During the past 30 days, on how many days did you use... one or more drinks of alcohol... five or more drinks of alcohol in a row, that is, within a couple of hours... marijuana (smoke, vape, eat, or drink)... inhalants (things you sniff, huff, or breathe to get “high”)... prescription drugs to get “high” or for reasons other than prescribed ... any other drug, pill, or medicine to get “high” or for reasons other than medical... two or more substances at the same time (for example, alcohol with marijuana, ecstasy with mushrooms)?

Notes: Cells are empty if there are less than 10 respondents.

Heavy drug use was calculated based on pattern of combined current drug use on three or more days (marijuana, inhalants, prescription pain medicine to get “high” (high school only) and any other illegal drug/pill to get “high”).

na—Not asked of middle school students.

Table A6.6***Frequency of Current AOD Use, Past 30 Days***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Alcohol (one or more drinks)				
0 days	96	93	81	59

3 to 9 days	0	1	3	0
10 to 19 days	0	1	1	4
20 or more days	1	1	1	8

Question HS A.77-79/MS A.69-71: During the past 30 days, on how many days on school property did you use... cigarettes... smokeless tobacco (dip, chew, or snuff)... electronic cigarettes, e-cigarettes, or other vaping device such as e-hookah, hookah pens, or vape pens?

Note: Cells are empty if there are less than 10 respondents.

Table A7.5***Cigarette Smoking Cessation Attempts***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Does not apply, don't use	na	97	93	66
0 times	na	2	5	20
1 time	na	1	1	10
2 to 3 times	na	0	0	0
4 or more times	na	1	0	4

Question HS A.95: How many times have you tried to quit or stop using cigarettes?

Notes: Cells are empty if there are less than 10 respondents.

na—Not asked of middle school students.

Table A7.6***Perceived Harm of Cigarette Smoking***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Smoke cigarettes occasionally				
Great	29	29	32	38
Moderate	35	39	34	18
Slight	18	17	21	14
None	18	14	13	30
Smoke 1 or more packs of cigarettes each day				
Great	71	70	72	58
Moderate	11	10	11	10
Slight	2	6	6	8
None	17	14	12	24

Question HS A.83, 84/MS A.75, 76: How much do people risk harming themselves physically and in other ways when they do the following?... Smoke cigarettes occasionally... Smoke 1 or more packs of cigarettes each day.

Note: Cells are empty if there are less than 10 respondents.

Table A7.7***Perceived Harm of E-Cigarette Use Compared to Smoking***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Use e-cigarettes or vaping device occasionally compared to smoking cigarettes				
Great	26	28	23	16
Moderate	31	31	23	26
Slight	23	25	33	18
None	20	16	21	40
Use e-cigarettes or vaping devices several times a day compared to smoking cigarettes				
Great	41	39	33	24
Moderate	27	30	25	22
Slight	14	16	27	20
None	18	15	15	34

Question HS A.85, 86/MS A.77, 78: How much do people risk harming themselves physically and in other ways when they do the following?... Use e-cigarettes (electronic) or vaping device occasionally compared to smoking cigarettes... Use e-cigarettes or vaping devices several times a day compared to smoking cigarettes.

Note: Cells are empty if there are less than 10 respondents.

Table A7.8***Perceived Difficulty of Obtaining Cigarettes and E-Cigarettes***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Cigarettes				
Very difficult	16	5	5	0
Fairly difficult	13	12	9	8
Fairly easy	20	33	25	14
Very easy	8	21	32	48
Don't know	42	28	30	30
E-Cigarettes or vaping device				
Very difficult	17	4	4	2
Fairly difficult	15	10	5	2
Fairly easy	16	25	17	20
Very easy	9	34	49	46
Don't know	42	26	25	30

Question HS A.91, 92/MS A.83, 84: How difficult is it for students in your grade to get any of the following if they really want them?... Cigarettes.... E-cigarettes (electronic) or vaping device

Note: Cells are empty if there are less than 10 respondents.

8. Other Physical and Mental Health Risks

Table A8.1

Cyber Bullying, Past 12 Months

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
0 times (never)	71	70	70	60
1 time	15	11	11	10
2 to 3 times	6	9	9	21
4 or more times	7	9	10	8

Question HS A.122/MS A.112: During the past 12 months, how many times did other students spread mean rumors or lies, or hurtful pictures, about you online, on social media, or on a cell phone?

Note: Cells are empty if there are less than 10 respondents.

Table A8.2

Alone After School

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Never	34	na	na	na
1 day	19	na	na	na
2 days	13	na	na	na
3 days	10	na	na	na
4 days	4	na	na	na
5 days	20	na	na	na

Question MS A.89: In a normal week, how many days are you home after school for at least one hour without an adult there?

Notes: Cells are empty if there are less than 10 respondents.

na—Not asked of high school students.

Table A8.3***Eating of Breakfast***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
No	24	33	47	54
Yes	76	67	53	46

Question HS A.126/MS A.115: Did you eat breakfast today?

Note: Cells are empty if there are less than 10 respondents.

Table A8.4***Chronic Sad or Hopeless Feelings, Past 12 Months***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
No	77	70	62	50
Yes	23	30	38	50

Question HS A.124/MS A.114: During the past 12 months, did you ever feel so sad or hopeless almost every day for two weeks or more that you stopped doing some usual activities?

Note: Cells are empty if there are less than 10 respondents.

Table A8.5***Seriously Considered Attempting Suicide, Past 12 Months***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
No	na	82	83	56
Yes	na	18	17	44

Question HS A.125: During the past 12 months, did you ever seriously consider attempting suicide?

Notes: Cells are empty if there are less than 10 respondents.

na—Not asked of middle school students.

Table A8.6***Gang Involvement***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
No	95	97	98	98
Yes	5	3	2	2

Question HS A.123/MS A.113: Do you consider yourself a member of a gang?

Note: Cells are empty if there are less than 10 respondents.

9. Race/Ethnic Breakdowns

Table A9.1

School Supports and Engagement by Race/Ethnicity - 7th Grade

Percent of Students (%)	Grade 7						
	H/L	AI/AN	Asian	AA	NH/PI	White	Mixed
School Environment							
Total school supports [‡]	30	34				31	31
Caring adults in school [‡]	36	36				33	35
High expectations-adults in school [‡]	47	56				49	47
Meaningful participation at school [‡]	7	10				10	11
School Connectedness[†]	27	30				28	26
Academic Motivation[†]	37	43				35	36
Parent Involvement in School[†]	24	33				25	22

Notes: Cells are empty if there are less than 10 respondents. H/L: Hispanic or Latino; AI/AN: American Indian or Alaska Native; AA: Black or African American; NH/PI: Native Hawaiian or Pacific Islander; Mixed: Mixed (two or more) races. [†]Average percent of respondents reporting “Strongly agree.” [‡]Average percent of respondents reporting “Very much true.”

Table A9.2

School Supports and Engagement by Race/Ethnicity - 9th Grade

Percent of Students (%)	Grade 9						
	H/L	AI/AN	Asian	AA	NH/PI	White	Mixed
School Environment							
Total school supports [‡]	20					26	20
Caring adults in school [‡]	24					28	25
High expectations-adults in school [‡]	28					39	29

Alcohol and Other Drugs (AOD) Module

1. Module Sample

Table B1.1

Student Sample for AOD Module

	Grade 7	Grade 9	Grade 11	NT ^A
<i>Student Sample Size</i>				
Target sample	383	380	374	78
Final number	322	310	248	48
Response Rate	84%	82%	66%	62%

Note: ^ANT includes continuation, community day, and other alternative school types.

2. Summary of Key Indicators

Table B2.1

Key Indicators of Alcohol and Other Drug Use

	Grade 7 %	Grade 9 %	Grade 11 %	NT %	Table
Alcohol and Marijuana Consumption Patterns					
Usually drank until felt it a lot	0	3	9	19	B3.3
Usually used marijuana or other drugs until felt it a lot	na	4	10	38	B3.4
Consequences of AOD Consumption					
Caused one or more problems	na	6	17	33	B4.2
Caused one or more dependency-related experiences	na	7	24	36	B4.3
Supports to Reduce AOD Use					
Very likely find help at school for quitting or reducing use	na	25	19	55	B5.2
Strong Personal Disapproval of AOD Use					
Having one or two drinks of any alcoholic beverage nearly every day	69	55	46	17	B7.1
Trying marijuana once or twice	58	40	20	7	B7.1
Using marijuana once a month or more	73	52	32	7	B7.1

*Notes: Cells are empty if there are less than 10 respondents.
na—Not asked of middle school students.*

3. Alcohol, Tobacco, and Marijuana Consumption Patterns

Table B3.1

Age of Onset – AOD Use

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Alcohol (one full drink)				
Never	82	69	46	23
10 or under	9	6	8	13
11-12 years old	8	7	3	10
13-14 years old	2	17	15	19
15-16 years old	0	2	27	29
17 years or older	0	0	2	6
Marijuana (smoke, eat, or drink)				
Never	95	87	57	23
10 or under	1	1	1	6
11-12 years old	3	2	2	19
13-14 years old	2	10	10	21
15-16 years old	0	0	29	27
17 years or older	0	0	1	4
Any other illegal drug or pill to get “high”				
Never	98	96	88	65
10 or under	0	1	0	0
11-12 years old	2	0	0	4
13-14 years old	0	3	2	10
15-16 years old	0	0	9	17
17 years or older	0	0	0	4

Question HS/MS B.1, 4, 5: About how old were you the first time you tried any of these things?... A drink of an alcoholic beverage (other than a sip or two)... Marijuana (smoke, eat, or drink)... Any other illegal drug or pill to get “high.”

Note: Cells are empty if there are less than 10 respondents.

Table B3.2***Age of Onset – Tobacco Use***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Smoked part or all of a cigarette				
Never	96	93	82	51
10 or under	1	0	2	9
11-12 years old	3	3	1	9
13-14 years old	0	4	6	13
15-16 years old	0	0	9	17
17 years or older	0	0	0	2
Electronic cigarette				
Never	93	81	56	29
10 or under	1	1	1	2
11-12 years old	4	3	2	8
13-14 years old	2	15	12	10
15-16 years old	0	0	27	40
17 years or older	0	0	3	10

Question HS/MS B.2, 3: About how old were you the first time you tried any of these things?... Part or all of a cigarette... An electronic cigarette (e-cigarette or vaping device).

Note: Cells are empty if there are less than 10 respondents.

Table B3.3***Usual Alcohol Consumption Level***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
I don't drink alcohol	96	84	63	42
Just enough to feel it a little	3	9	15	17
Enough to feel it moderately	1	5	13	23
Until I feel it a lot or get really drunk	0	3	9	19

Question HS/MS B.6: If you drink alcohol, how much do you usually drink?

Note: Cells are empty if there are less than 10 respondents.

Table B3.4***Usual Marijuana Consumption Level***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
I don't use drugs	na	89	67	30
Just enough to feel a little high	na	5	8	6
Enough to feel it moderately	na	3	15	26
Until I feel it a lot or get really high	na	4	10	38

Question HS B.7: If you use marijuana or other drugs, how "high" (stoned, faded, wasted, trashed) do you usually like to get?

Notes: Cells are empty if there are less than 10 respondents.

na—Not asked of middle school students.

Table B3.5***E-Cigarette Consumption***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Have you ever used an e-cigarette or vaping device to consume any of the following? (Mark All That Apply.)				
I've never used an e-cigarette or vaping device	92	84	58	23
Nicotine or tobacco substitute	3	8	26	44
Marijuana or THC	1	5	19	56
Amphetamines, cocaine, or heroin	0	0	0	2
Alcohol	1	1	3	4
A flavored product without nicotine, alcohol, or other drug	5	12	27	40
Any other product or substance	1	1	2	6

Question HS B.30/MS B.24: Have you ever used an e-cigarette or vaping device to consume any of the following? (Mark All That Apply.)

Notes: Cells are empty if there are less than 10 respondents. Total percentages may exceed 100% for "mark all that apply" items.

4. Reasons for and Consequences of AOD Consumption

Table B4.1

Reasons for AOD Use in the Past 12 Months

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Does not apply, I haven't used alcohol, marijuana, or other drugs in the past 12 months	86	79	47	21
To experiment (try using)	3	12	17	11
To get high	1	6	24	51
To have a good time with friends	2	9	35	60
To fit in with a group you like	1	2	5	0
Because of boredom	1	4	11	26
To relax	2	8	27	57
To get away from problems	2	6	16	36
Because of anger or frustration	2	4	12	30
To get through the day	1	3	8	26
Because it made you feel better	2	6	14	47
To seek deeper insights and understanding	1	1	9	17
None of the above	11	5	6	9

Question HS B.8/MS B.7: Have you used alcoholic beverages, marijuana, or other drugs in the past 12 months for any of the following reasons? (Mark All That Apply.)

Notes: Cells are empty if there are less than 10 respondents. Total percentages may exceed 100% for "mark all that apply" items.

Table B4.2***Problems Caused by AOD Use***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Doesn't apply; I've never used alcohol or drugs	na	84	51	33
I've used alcohol or drugs but never had any problems	na	10	33	37
Have problems with emotions, nerves, or mental health	na	2	6	12
Get into trouble or have problems with the police	na	1	3	14
Have money problems	na	0	2	5
Miss school	na	1	2	12
Have problems with schoolwork	na	1	4	9
Fight with others	na	1	0	7
Damage a friendship	na	2	3	9
Physically hurt or injure yourself	na	1	2	2
Have unwanted or unprotected sex	na	1	5	5
Forget what happened or pass out	na	4	9	16
Been suspended from school	na	0	1	7
<i>One or more problems</i>	na	6	17	33

Question HS B.9: Has using alcohol, marijuana, or other drugs ever caused you to have any of the following problems? (Mark All That Apply.)

Notes: Cells are empty if there are less than 10 respondents. Total percentages may exceed 100% for "mark all that apply" items.

na—Not asked of middle school students.

Table B4.3***Alcohol or Other Drug Use Caused Negative Experiences***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Does not apply; I have not used alcohol or drugs	na	85	54	36
I use alcohol or drugs but have not experienced any of these things	na	8	24	31
Found you had to increase how much you use to have the same effect as before	na	2	9	20
Frequently spent a lot of time getting, using, or being hung over from using alcohol or other drugs	na	1	5	7
Used alcohol or drugs a lot more than you intended	na	1	7	4
Used alcohol or drugs when you were alone	na	4	16	31
Your use of alcohol or drugs often kept you from doing a normal activity	na	0	2	4
You didn't feel OK unless you had something to drink or used a drug	na	1	2	7
Thought about reducing or stopping use	na	2	11	16
Told yourself you were not going to use but found yourself using anyway	na	2	7	4
Spoke with someone about reducing or stopping use	na	1	7	7
Attended counseling, a program, or group to help you reduce or stop use	na	0	1	0
<i>One or more negative experiences</i>	na	7	24	36

Question HS B.10: If you use alcohol, marijuana, or another drug, have you had any of the following experiences? (Mark All That Apply.)

Notes: Cells are empty if there are less than 10 respondents. Total percentages may exceed 100% for "mark all that apply" items.

na—Not asked of middle school students.

Table B4.4***Likelihood of Suspension, Expulsion, Transfer Because of AOD Use/Possession***

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
Very likely	na	35	41	38
Likely	na	34	33	27
Not likely	na	11	13	8
Don't know	na	20	13	27

Question HS B.13: In your opinion, how likely is it that a student will be suspended, expelled, or transferred if he or she is caught on school property using or possessing alcohol or other drugs?

Notes: Cells are empty if there are less than 10 respondents.

na—Not asked of middle school students.

5. Supports to Reduce AOD Use

Table B5.1

Needed Counseling for Use

	Grade 7 %	Grade 9 %	Grade 11 %	NT %
No, I never used alcohol or other drugs	na	86	57	32
No, but I do use alcohol or other drugs	na	13	40	60
Yes, I have felt that I needed help	na	1	4	9

Question HS B.11: Have you ever felt that you needed help (such as counseling or treatment) for your alcohol or other drug use?

Notes: Cells are empty if there are less than 10 respondents.

na—Not asked of middle school students.

Table B5.2

Likelihood of Finding Help at School for Quitting or Reducing Use

	Grade 7 %	Grade 9 %	Grade 11 %	NT %

Fine Arts Academy	70			
Paloma Creek High				67
West Mall Alternative	33	53	52	

Notes: Response rates are presented by grade level. Eligible schools listed are based on CBEDS 2017-18 public school and enrollment data files. Directly funded charter schools have been excluded from the list.

Appendix II

California Healthy Kids Survey Content Overview

This brief guide to key CHKS Core Module indicators is designed to help survey users more easily understand and interpret their findings.¹ References are provided to the tables in CHKS reports where results for the indicators discussed can be found. References are also made to relevant CHKS reports and factsheets and What Works Briefs (guides to best practices) that provide further information. These valuable resources can be downloaded, respectively, from the CHKS and California Safe and Supportive Schools websites (chks.wested.org/using-results/factsheets; californias3.wested.org/tools/research; californias3.wested.org/tools/wwb).

Special attention is directed toward indicators related to the requirements of California’s Local Control and Accountability Plans (LCAP).² For a summary of state-level LCAP-related baseline data, see CHKS Factsheet #15.

MAIN CONTENT FOCUS: SCHOOL CLIMATE AND THE NEEDS OF THE WHOLE CHILD

The main purpose of the CHKS Core Module is to assess indicators of school climate, pupil engagement, and student supports, all three key priorities required of Local Control and Accountability Plans. It seeks to provide schools with essential data to determine the degree to which they provide the conditions and supports that all youth need to succeed in school and developmentally thrive. Twenty-nine items assessing seven domains are used to calculate a School Climate Index (SCI) score that is included in a *School Climate Report Card* that districts can request at the district and school level. The items used in the SCI assess school connectedness, developmental supports (e.g., caring adult relationships), perceived safety, bullying, and victimization.

School climate, as measured by the CHKS, is strongly related to student performance on standardized academic tests. Data show that, for high school students, as CHKS School Climate Index (SCI) scores increased—as the schools became safer, more supportive, and more engaging—test performance as measured by the state’s Academic Performance Index (API) increased as well (School Climate Factsheet #3).

In a ground-breaking analysis, a positive school climate was a distinguishing characteristic of California secondary schools that “beat the odds” and consistently performed better on the state’s standardized tests than *would be predicted* based on the characteristics of their students (i.e., comparing schools with similar student demographics). The higher (more positive) the CHKS School Climate Index score, the greater the probability there was for beating the odds. School climate was more strongly associated with beating the odds than a school’s level of personnel resources (School Climate Factsheet #6).³

¹ To see how local results compare with state averages in California, download a copy of the latest Biennial Statewide CHKS report (chks.wested.org/reports). The Biennial report provides results from a randomly-selected, representative state sample. County level reports are also available on the CHKS website.

² For a guide to how CalSCHLS survey items align with LCAP indicator requirements, download *Helpful Resources for Local Control and Accountability Plans* at surveydata.wested.org/resources/LCAP_Cal_SCHLS.pdf.

³ Voight, Austin, & Hanson, (2013). Download www.wested.org/online_pubs/hd-13-10.pdf

More generally, the CHKS Core Module provides data to help understand the degree to which schools address the needs of the Whole Child. CHKS data show that California secondary schools made greater progress in raising standardized test scores over a one-year period when they had higher percentages of students who: (1) were less engaged in risky behaviors such as substance use and violence; (2) were more likely to eat nutritiously and exercise; and (3) reported experiencing caring adult relationships and high expectations at school. These results suggest that addressing the health and developmental needs of youth is a critical component of a comprehensive strategy for meeting accountability demands for improved academic performance (CHKS Factsheet #3).

GRADE-LEVEL PATTERNS

More than twenty years of survey administration has demonstrated that as youth progress through secondary school, they become: (1) less likely to feel connected to school and be academically motivated; and (2) more likely to report truancy, involvement in substance use, and chronic sadness and hopelessness.

- **Seventh graders** report the highest rates of harassment and victimization, as well as participation in a physical fight and seeing a weapon on campus.
- **Ninth graders** report the lowest rates of developmental support and perceived safety.
- In interpreting the results for **11th graders** take into consideration that many youth who are most disengaged and involved in high risk behaviors may have already dropped out of school or did not participate in the survey because of truancy or absenteeism.
- Across risk behaviors and problem indicators, **nontraditional (continuation school) students** reported prevalence rates at least twice those of 11th graders in a comprehensive school setting. They also exhibited lower perceived school safety, school connectedness, and developmental supports. Continuation school students are a highly vulnerable population in need of a wide range of academic, social, emotional, and behavioral supports and intervention services (CHKS Factsheet #7).

DEMOGRAPHIC CHARACTERISTICS AND POPULATION SUBGROUP DIFFERENCES

Demographic Characteristics (Tables A3.1-3.14)

A wide range of data on the demographic and background characteristics of the survey respondents is provided (in 14 tables) to help users gain a better sense of how representative the survey sample is compared to the student population overall. This also enables users to analyze their data to determine how survey results vary by important subgroups in the school and help them identify, and target programs at, the youth most in need. School districts can use these data to meet the Local Control and Accountability Plan (LCAP) requirement to demonstrate actions across state priorities in regard to six numerically significant subgroups: ethnicity, socioeconomically (SES) disadvantaged, English learners, pupils with disabilities, foster youth, and homeless youth—all categories assessed by the CHKS. In the standard CHKS report, and in the Query CHKS system, breakdowns for selected key indicators are provided by race/ethnicity and gender. Districts/schools

can request reports disaggregating all their results by demographic characteristics from their Regional CHKS Technical Assistance Center.

Racial-Ethnic Identification (Tables A3.2-3.3)

Respondents self-report their identification with six racial/ethnic groups plus mixed (two or more) race. Comparing these data with other evidence of the racial-ethnic composition of student enrollment provides insight into how representative are the survey results. In one study of CHKS data, both academic performance and school well-being—the degree to which students feel safe at, supported by, and connected to the school—varied consistently and persistently across schools by racial/ethnic groupings. They were lowest in schools with large proportions of African American and Hispanic students, as well as in low-income schools. Controlling for socioeconomic status and other school demographic characteristics reduced these racial/ethnic group differences, but they still remained. This suggests that school climate factors related to student well-being may also play a role in the racial-ethnic achievement gap. One strategy to close the gap thus may be to enhance learning supports that foster caring adult relationships, high expectations, meaningful participation, safety, and connectedness in schools serving large proportions of low-income African American and Hispanic students (CHKS Factsheet #8).

In the majority of cases, with notable exceptions for Asians, *the racial/ethnic gaps in performance, engagement, perceived support, and safety are greater within-schools than between-schools*. African American, Latino, and Asian students feel less safe, engaged, and supported than their White peers *within the same school*. Inequities in these factors, for the various racial/ethnic groups, can possibly contribute to the achievement gap. Further, these findings suggest that practices designed to ensure equal access to academic resources, opportunities, learning supports, and promotion of common experiences may be effective in ameliorating the gap (CHKS Factsheet #13).

Foster Care Youth (Table A3.4)

Compared to youth who live with their parents, foster care youth report much higher rates of substance abuse, poor school attendance and grades, more violence-related behaviors, more harassment, and higher depression risk. They were also more likely to be low in caring adult relationships and total environmental assets (CHKS Factsheet #6).

SPECIFIC CONTENT AREAS

Self-Reported Grades (Table A4.1)

The CHKS asks students to indicate what grades they mostly received in school in the past 12 months. Although self-reports are not as accurate as actual report card data, they provide a general sense of the school performance of the survey respondents from their self-perception. To learn more about the factors that might be causing poor performance, request a CHKS report showing how all the survey results vary by level of performance.

Absenteeism and Truancy (Tables A4.2-4.3)

Before top teachers with quality curriculums and engaging activities can even attempt to improve academic performance, the students have to show up. The CHKS report provides data to identify what proportion of respondents are at risk of chronic absenteeism (missed 3 or more of the past 30

school days), what were the reasons for absences, and the level of truancy. Users can request reports looking at the characteristics of youth based on the absenteeism and truancy to guide efforts to improve the LCAP pupil engagement priority.

Poor attendance is a marker of a wider variety of other problems, including low school connectedness and learning engagement. Both the US Department of Education and the California Office of the Attorney General have launched initiatives designed to raise awareness about and combat chronic absenteeism, generally defined as missing 10% of school days. According to a report by Attendance Works, the nation's large and persistent education achievement gaps are rooted in a largely hidden crisis of chronic absenteeism, especially among low-income and minority children.⁴ Biennial State CHKS data (Table A4.3) indicate that generally, after illness, the most important reasons for being absent in secondary school are not getting enough sleep and anxiety or stress, followed by being behind in school work, and being bored or uninterested in school.

Among high school staff statewide, truancy is the top-rated of fourteen potential school problems assessed by the California School Staff Survey (Table A8.4). Truancy has been identified as one of the most powerful predictors of both poor achievement and delinquency.⁵ Truants are also more likely to use drugs and have deviant friends.

Developmental Supports (Tables A4.5, A4.7-4.9)

Research shows that when schools (or families or communities) provide three developmental supports measured by the CHKS—**caring adult relationships, high expectations, and opportunities for meaningful participation**—students are more likely to report more positive academic, social-emotional, and health outcomes, including higher grades, school connectedness, attendance, and perceived safety. CHKS results overall suggest that the great majority of students do not receive sufficient levels of support and that the supports received are lower in high school than in middle school, even though student need for them is arguably higher (CHKS Factsheets #1 and #3; School Climate Factsheets #1 and #2, What Works Briefs #1 and #2).

School Connectedness (Table A4.6)

School connectedness is one of the indicators of school climate that a California school district must address in its LCAP. Research shows that school connectedness is associated with multiple positive academic, social-emotional, and health outcomes. The CHKS five-item School Connectedness Scale is an important differentiator between low-performing and high-performing high schools and has value as an indicator of school quality. School connectedness appears to have increased in California in the second half of the last decade, but it still declines markedly after elementary school. A substantial majority of high school students are not highly connected to their schools. This may be related at least in part to their lower levels of developmental support. The lowest rates of both connectedness and test scores are in low-income schools. The online Query

CHKS system shows how key survey indicators vary by school connectedness (see School Climate Factsheet #5, What Works Brief #4).

Perceived Safety (Table A5.1)

Perceived safety is another indicator districts/schools are required to monitor as part of their LCAP. Perceived school safety is more than the antithesis of violence. Perceived school safety is psychological as well as physical. Feelings of insecurity can have multiple sources, not all of which correctly reflect the level of danger and violence on a school campus, such as verbal bullying. Both physical and psychological safety are essential for high quality teaching and learning. If students report low levels of perceived school safety, pay close attention to all the indicators related to bullying and victimization, as well as mental health. Schools may want to request comparisons of students' perceptions of their own safety with the actual level of violence and other safety-related indicators self-reported by students. A follow-up focus group or Student Listening Circle asking why students do not feel safe is recommended (see School Climate What Works Brief #3).

Violent and Nonviolent Misbehavior on School Property (Tables A5.2-5.6)

The CHKS asks students a wide range of questions to ascertain the scope and nature of physical and verbal violence and victimization that occurs on campus, as well as vandalism. Physical violence and weapons on campus (Tables A5.4, A5.6) have long been a major public concern. Equally disruptive are the uncounted acts of bullying, teasing, and other nonviolent misbehavior among youth, such as substance use and sales on campus.⁶ These behaviors adversely affect not only students' ability to learn and willingness to attend school, but also the overall school environment, the ability of teachers to teach, and the willingness of adults to enter the teaching profession⁷ (see School Climate What Works Briefs #5 and #6).

Harassment (Tables A5.2-5.3)

Nonviolent harassment in any form—threats, intimidation, rumors, and ostracism—can instill a sense of vulnerability, isolation, frustration, and fear among its victims, leading to engagement in health risk behaviors or avoidance behaviors such as missing school and social isolation. This type of misbehavior, vastly more common than any other, ruins the school day for many students. In *Bruised Inside* (2000), the National Association of Attorneys General describes harassment by peers as one of the two causes for kids to express anger using guns, knives, and fists.⁸

The CHKS asks about the frequency with which students experienced any bullying/harassment related to six bias-related categories (gender, race/ethnicity, disability, sexual identity, religion, immigrant status), as well as for any other reason. Analysis of this data show that victims of harassment are more likely to not feel safe at, and connected to, school; to have higher truancy; and to experience lower developmental (resilience) supports at school. They report higher rates of fighting and weapons possession at school, as well as risk of depression. Students who report bias-related harassment, particularly for disability and sexual orientation, have poorer well-being than

Washington, DC: National Association of Attorneys General.

students who were only harassed for other reasons (CHKS Factsheets #4 and #10; see also School Climate What Works Brief #7).

Substance Abuse (Tables A6.1-6.11)

The misuse of alcohol and other drugs continues to be among the most important issues confronting the nation. For schools, the problem is particularly relevant. Years of research have shown that adolescent substance use is closely connected to academic performance and contributes to raising the level of truancy and absenteeism, special education, disciplinary problems, disengagement and dropout rates, teacher turnover, and property damage. Reflecting this, on the California School Staff Survey (Table A9.12), high school staff statewide are more likely to perceive alcohol and drug use as moderate to severe problems at their schools than all of seven violence-related indicators (49% for both alcohol and drugs in 2004-06), ranking them among the top 3 of 14 problem indicators.

Use at school is especially troubling (Tables A6.8-6.9). It reflects a level of drug involvement so pervasive that the potential repercussions for violation of school rules are disregarded by these youths. This is behavior that threatens not only the user's learning ability but also school efforts to educate all youth. An analysis of CHKS data found that that substance use and intoxication at school, being offered drugs at school, and lifetime intoxication, were significantly related to changes in California achievement test scores one year later. Schools with proportionately large numbers of students who reported these behaviors exhibited smaller gains in test scores than other schools⁹ (CHKS Factsheet #3; see also School Climate What Works Brief #8).

Cigarette Smoking (Tables A7.1-7.4)

Current smokers are significantly more likely than nonsmokers to engage in alcohol and other drug use, be involved in violence and gang membership, and experience school-related problems and disengagement. To a lesser extent, current smokers are also more likely than nonsmokers to be victims of violence and harassment, feel unsafe at school, and experience incapacitating sadness and loneliness. These results suggest that efforts to reduce student smoking may be more successful if embedded in approaches that address a broad range of risk behaviors and problems (CHKS Factsheet #2 and #5).

Mental Health (Tables A8.4-8.5)

The CHKS Core provides two measures for assessing mental health among students: (1) whether they experience chronic, incapacitating sadness or hopelessness; and (2) whether they ever contemplated suicide. Students who experience chronic sadness, compared to their peers who do not, are at elevated risk of a wide range of educational, health, social, and emotional problems, including lower school attendance, performance, and connectedness. They also report lower levels of the developmental supports in their schools and communities that have been shown to mitigate these problems. Similar findings are found among youth who have contemplated suicide (CHKS Factsheets #11 and #12).
