

## FIDELITY RATING FORM: START ON TIME (TARDY SWEEPS)

Assess the START On Time Program by selecting one rating for each Fidelity Element. Use the following Fidelity Rating Rubrics to make your ratings. There are no scores to calculate. The intention is that users will identify elements without high fidelity and make changes in future implementation leading to higher fidelity.

Please note: This fidelity assessment is in no way an endorsement by CDE or WestEd of the START On Time Program.

### Fidelity Rating Rubrics

**High:** The element as implemented was a precise match to the program element described, or varied in a small way that could be reasonably interpreted to match the general intent of the program designers. An example is a program designed for drug user intervention directed to drug users; or, for numerical elements (number of lessons, sessions, time on task, etc.) the program was within 10% of the recommendation.

**Moderate:** The element as implemented was somewhat different from the program element described. An example is a program designed for drug user intervention directed to groups with both drug users and nonusers; or, for numerical elements (number of lessons, sessions, time on task, etc.) the program was between 50% and 90% of the recommendation.

**Low:** The element as implemented was very different from the program element described. An example would be a program designed for drug user intervention directed instead to general population students; or, for numerical elements (number of lessons, sessions, time on task, etc.) the program was below 50% of the recommendation.
